6. Interview Summary (PTO-413),
Paper No./Mail Date _____.
7. Examiner's Amendment/Comment
8. Examiner's Statement of Reasons for Allowance
9. Other _____.

1. The following is an examiner's statement of reasons for allowance: Independent claim 1 requires novel features of "a bank of shift registers, for loading a succession of pixel value from a digital image, each successive pixel value being loaded at a preselected clock interval; a set of coefficient registers that correspond to said bank of shift registers, for storing coefficient values implementing a wavelet filter; a multiplier/accumulator circuit that generates, at said preselected clock interval, a result based on application of said coefficient values against the succession of pixel values stored by said bank of shift registers". In particular, the specific implementation of the wavelet transformation using a bank of shift registers and a set of coefficient registers renders the claim allowable. Independent claims 30, 41, 63 require similar features. None of the prior art whether taken singly or in combination discloses the claimed invention.

Tucker et al and Carlson et al are cited for disclosing the state of the art of image filters. These references fail to disclose the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
